Question No. 1

An administrator manages a vSphere-based Nutanix cluster and has enabled Flash Mode for extremely latency sensitive workloads. The administrator recently migrated several workloads from this cluster to another cluster with higher CPU and memory, users complained about the VM performance of the latency sensitive workloads. What must the administrator do to resolve this issue?

- **A.** Manually fingerprint the migrated workloads
- **B.** Flash Mode can only be enabled on the VM during the migration
- **C.** Flash usage exceeds 20% of the new SSD capacity tier
- **D.** Manually enable Flash Mode on the migrated workloads

Answer: A

Question No. 2

Recently, many important files were deleted from a specific folder within a File share. The administrator is asked to provide a list of files that were deleted.

Within File Analytics, how can the administrator determine which files have been deleted in that specific timeframe?

- **A.** Select
